

# THE BENEFITS OF AN EVM GAP ANALYSIS: U.S. Government EVM Compliance Thresholds

*Use today's performance data to manage and control future outcomes.™*

**The contract value of your U.S. Government program drives the extent of your Earned Value Management (EVM) needs.**

Most U.S. Government agencies have policies that recognize the [SAE EIA-748-C Standard for Earned Value Management Systems](#) (EVMS) as the framework for integrated program management. The Department of Defense (DoD) has even established dollar value thresholds for EVMS use on its contracts. These thresholds have been adopted by other agencies, but not across the board. The DoD's thresholds are as follows:

Contract Value	Compliance with SAE EIA-748-C
<\$20 Million	Compliance may be required
≥\$20 Million but <\$100 Million	Compliance is required, but System Validation by a government-recognized agency is not required
≥\$100 Million	Compliance and System Validation are required

*Paraphrased from DoDI 5000.02, January 7, 2015 (Change 4, 08/31/2018)*

Performing an EVM Gap Analysis today is a proactive step to help your organization identify limitations in your current program management environment so you can begin to implement the necessary improvements for compliance. Your ability to demonstrate use of industry best practices for program management makes you more competitive for U.S. Government contracts that require a compliant EVMS.

If you're running a commercial program or high-risk internal project that does not have an EVMS requirement, you should still consider applying industry best practices in order to take advantage of proven cost- and time-efficiencies.

## How TriVariant Can Help

We bring more than a decade of experience supporting proposals and contracts with Earned Value Management requirements. Our consultants have the knowledge and experience to assist you in identifying areas where your current program management environment can improve. Additionally, we can provide a plan and step by step guidance to help your team implement the changes. For details on how TriVariant can help you conduct an EVM Gap Analysis, please email [info@trivariant.com](mailto:info@trivariant.com) or complete our short online [Request for Information form](#).
